DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of restriction in the reply filed on August 31, 2006 is acknowledged. The traversal is on the ground(s) that there is no patentably distinct determination. This is not found persuasive because there is a distinct difference between the species thus determining a distinct patentability. The requirement is still deemed proper and is therefore made FINAL.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Skwierawski on September 14, 2006.

The application has been amended as follows: Cancel claims 45-55 and 57-62.

3. The following is an examiner's statement of reasons for allowance: The present invention is directed toward an AV system having a bus for transmitting or receiving an AV signal and management information. Independent claims uniquely identify "each of said devices includes means for issuing a request to at least one other device through said bus to acquire the operating condition of the time management section and the

current time.” The closes prior art fails to anticipate or render to the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
